DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 12, 13, and 15 are rejected under 35 U.S.C. 102(e) as being anticipated by Sem et al. (US 2003/0008326).

Regarding claims 1, 12, and 15, Sem et al. discloses a method and product of identifying a three-dimensional molecular structure (Abstract, lines 1-3), comprising:

- accessing a computer readable representation of a reference structure having a plurality of residues (paragraph 0064, lines 1-14);
- calculating interaction between said plurality of residues and the molecular structure (paragraph 0069, lines 1-5);
- producing a residue fingerprint based on said interaction to identify the molecular structure (paragraph 0121, lines 13-16).

Regarding claim 13, Sem et al. discloses classifying the plurality of molecular structures into clusters based on said plurality of residue fingerprints, each cluster of molecular structures having a similar binding mode (paragraph 0121, lines 13-16).

Allowable Subject Matter

2. Claims 2-11, 14, 16, and 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Reasons For Allowance

3. The combination or method as claimed wherein denoting said residue as an interacting residue when the interatomic distance is less than a predetermined threshold (claims 2, 6-10, 16, 17) or computing the similarity between the molecular structure and said second molecular structure based on said residue fingerprint and said second residue fingerprint (claim 11) or computing a Tanimoto score among the molecular structures in each cluster of the plurality of molecular structures, wherein each pair of structures within a cluster of molecular structures has a similar Tanimoto score (claim 14) is not disclosed, suggested, or made obvious by the prior art of record.
